Portfolio Github LinkedIn

Results-driven Software Engineer skilled in AI automation and CMS development. I build CRM and AI-powered workflows with GoHighLevel and n8n, and fast, conversion-focused websites with WordPress, Webflow, Wix, Squarespace, and Shopify. I delivered a live GoHighLevel automation system for a US client covering lead capture, SMS and email follow-ups, missed-call text-back, and reporting. Strong with APIs, webhooks, integrations, and prompt engineering, and currently learning LangGraph to build AI agents.

Experience

Full Stack & AI Automation Developer – GoHighLevel, n8n & WordPress *Mar 2026 - Current*

StepTech

- Built a complete live GoHighLevel CRM system for a US construction client with 18 automation workflows: instant lead response, appointment confirmation and reminders, estimate follow-ups, customer onboarding, review requests, and 30/60/90-day reactivation.
- Set up lead capture (survey, forms, booking calendar), sales pipeline, UTM source tracking, automatic project-type and source tags, and a dashboard for leads, conversion, and revenue by source.
- Configured missed-call text-back, call forwarding and recording, A2P 10DLC registration, SMS consent handling, and a verified email domain (SPF, DKIM, DMARC).
- Built an AI project manager agent with Claude Code: projects are submitted through a form (description, duration, etc.) and the agent reviews each one and assigns it to the most relevant team member in Trello.
- Built n8n workflows (AI CV analyzer, weather forecasting) and AI agents that convert Figma designs and reference websites into WordPress pages.
- Developed WordPress websites with custom themes and plugins, GSAP animations, ACF, custom post types, form handling, and API integrations, plus React.js and Next.js interfaces.

WordPress Front & Backend Developer (Remote) *Aug 2025 - Jan 2026*

AHM (Allied Health Media)

- Developed and maintained high-performance WordPress websites for a Dubai-based agency.
- Created GoHighLevel forms and embedded them into client websites for lead capture.
- Engineered custom themes, responsive user interfaces, and advanced interactive animations.
- Architected backend features including custom post types, robust form handling, secure user authentication, and seamless API integrations.

CMS And Full-Stack Developer
Jan 2025 - Mar 2026

Zaple

- Managed end-to-end development of complex CMS-driven websites, creating modern front-end interfaces with HTML, CSS, JavaScript, React.js, and Next.js.
- Oversaw backend content management architectures, implementing secure forms, robust user authentication, streamlined workflows, and custom plugin configurations.

WordPress & Frontend Developer
Apr 2024 - Jan 2025

Tech-Zone 360

- Collaborated with senior developers to build scalable, high-performance internal web pages using React.js, Next.js, HTML, CSS, and JavaScript.
- Developed highly reusable UI components while strictly ensuring alignment with design specifications and project standards.
- Implemented layout adjustments and optimized configurations for various client WordPress websites.

WordPress & Frontend Developer (Intern)
Dec 2023 - Mar 2024

Ignytes Digital

- Collaborated closely with senior developers and UI/UX designers to create responsive, interactive frontend interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Significantly improved overall user experience across multiple web applications while executing structural layout updates on client WordPress platforms.
